SLIDE

01/12

Freshers don't know if they're **actually** job-ready.

Applications go out. Rejections come back. No feedback, no direction — just guesswork.

01 Invisible resumes

Students submit resumes with **no idea if an ATS can even parse them**. Great candidates get filtered out before a human ever reads a line.

02 Rejection without reason

Applications disappear into a black hole. **No feedback, no signal** on which skills or keywords are actually missing.

03 Skill gap in the dark

"Which skills does a Data Analyst role actually need?" Students guess, watch random tutorials, and **learn things employers never ask for**.

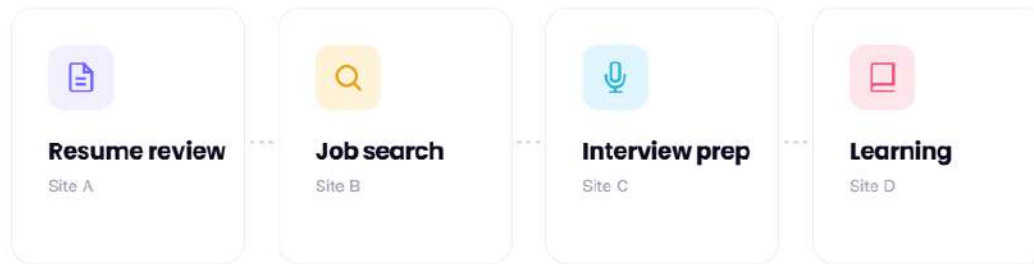

04 Six tabs, zero clarity

Resume review on one site, interview prep on another, jobs on a third. **Nothing connects**, nothing is personalized.

Every tool solves **one slice** of the problem. None solves the whole.

TODAY • FRAGMENTED

4 tabs. 4 accounts. Zero context.

✗ No shared profile • No context transfer • Repeated data entry

WITH PATH TO HIRE • UNIFIED

One resume. One dashboard. One path.

**Everything you need,
from one upload.**

✓ ATS Analysis

✓ Skill Gap

✓ Mock Interview

✓ Live Jobs

✓ Personalized Path

✓ One Dashboard

One profile. AI reasoning across your resume, target role, and market signals.

Upload a resume. Get a **personalized path**.

Path to Hire turns a PDF resume plus a target role into a five-step, AI-generated readiness plan — powered by Google Gemini.

1

Resume Upload

Drop a PDF. Parsed instantly, securely.

2

AI Analysis

Gemini scores ATS, extracts strengths & gaps.

3

Skill Gap

Compare your resume against target-role skills.

4

Recommendations

Mock interviews, live jobs, learning priorities.

★

Career Growth

A single, evolving dashboard of readiness.

Six capabilities. One **career OS**.

01 • INTAKE

Resume Upload

Drag & drop PDF. Auto-parsed into structured sections in seconds.

PDF

Secure

02 • INTELLIGENCE

AI Resume Analysis

ATS score, strengths, weaknesses, missing keywords, improvements.

ATS

Gemini

03 • TARGETING

Skill Gap Analysis

Pick a target role. See missing skills, match %, and priority order.

Match %

Priority

04 • PRACTICE

AI Mock Interview

Role-specific questions, generated on demand for real prep sessions.

Role-aware

On-demand

05 • OPPORTUNITIES

Live Job Feed

Fresh internships & entry roles, pulled live and matched to your profile.

Live API

Matched

06 • CONTROL CENTER

Personalized Dashboard

Every analysis, every opportunity, every next step — in one place.

Unified

Realtime

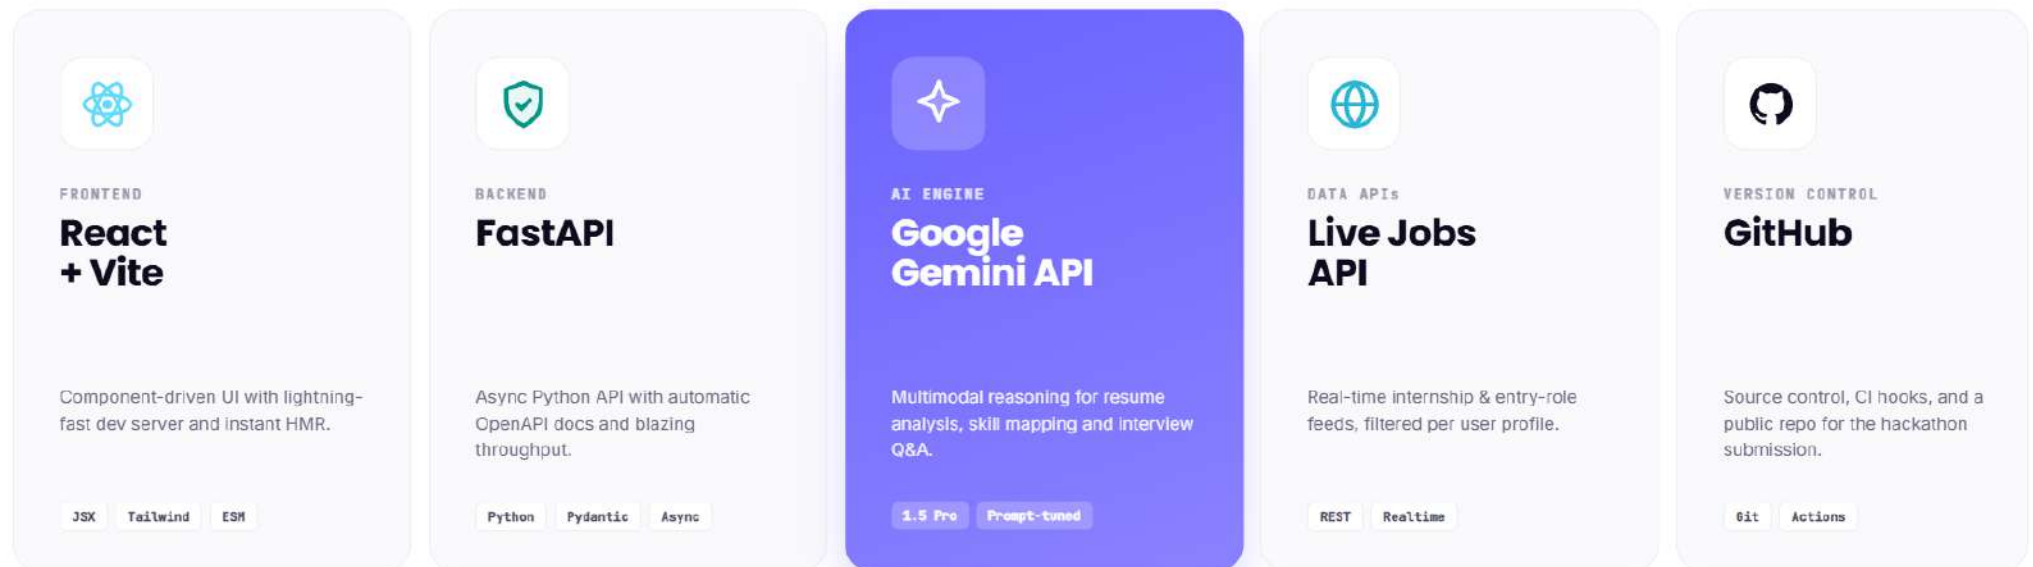

From PDF to **personalized plan** in 60 seconds.

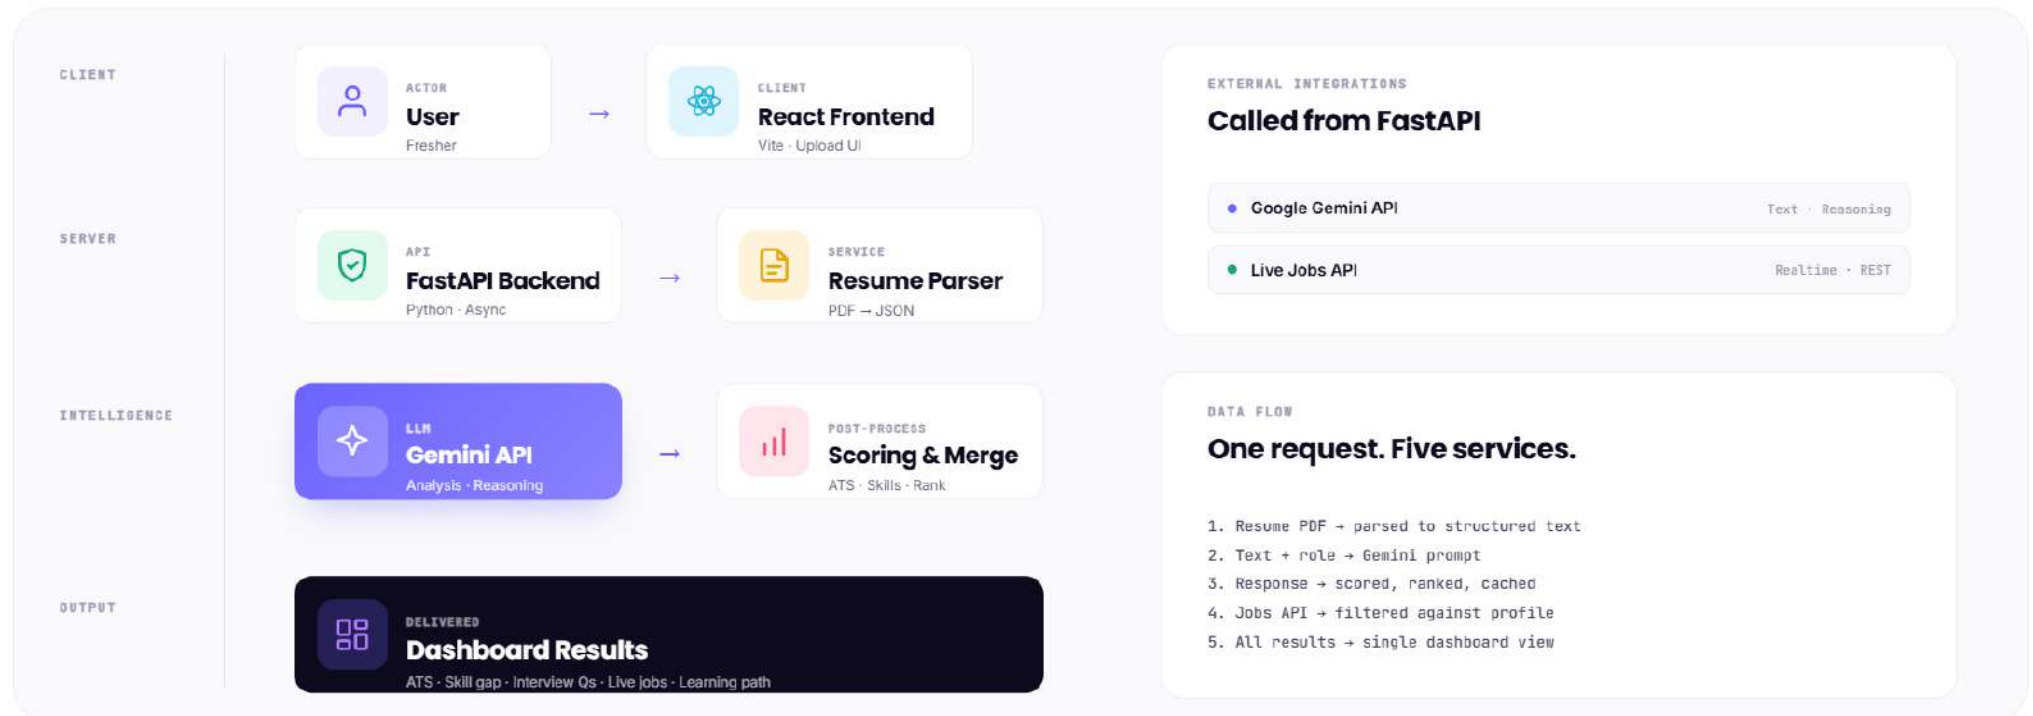

User → React → FastAPI → Parser → Gemini → Dashboard

Built on a **modern, minimal** stack.

Chosen for speed of iteration, AI-first architecture, and production readiness.

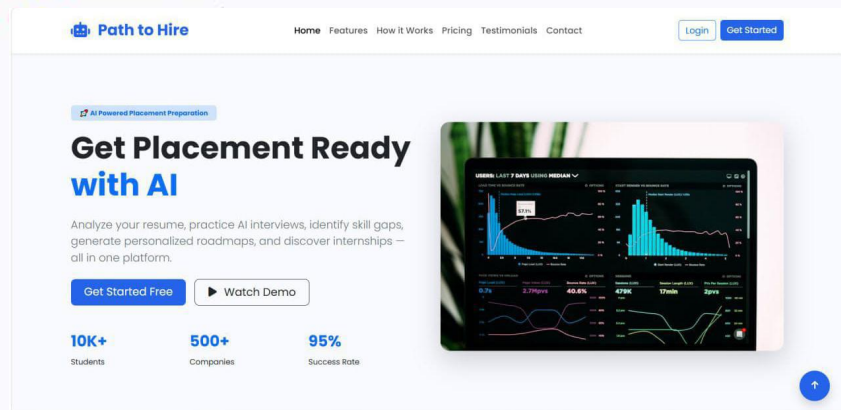

A clean pipeline from **upload** to **insight**.

A working prototype — not a mockup.

Every screen below is live in the shipped demo. Screenshots to be inserted before final submission.

SCREEN 01

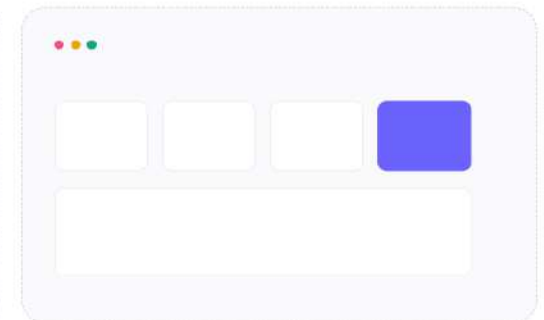

Landing Page

Hero, value proposition, single primary CTA — "Upload your resume".

SCREEN 02

Resume Upload

SCREEN 03

Dashboard

SCREEN 04 • Resume Analysis

SCREEN 05 • Summary

Six reasons this **wins**.

01

One Platform

Resume, skills, interviews, jobs — all in a single dashboard.

02

AI Personalization

Every insight is generated for *your* resume and *your* target role.

03

Easy to Use

Upload → select role → get results. Zero-config, no learning curve.

04

Career Focused

Not a resume tool. A career readiness system built role by role.

05

Time Saving

Replaces four tabs and hours of manual research with one workflow.

06

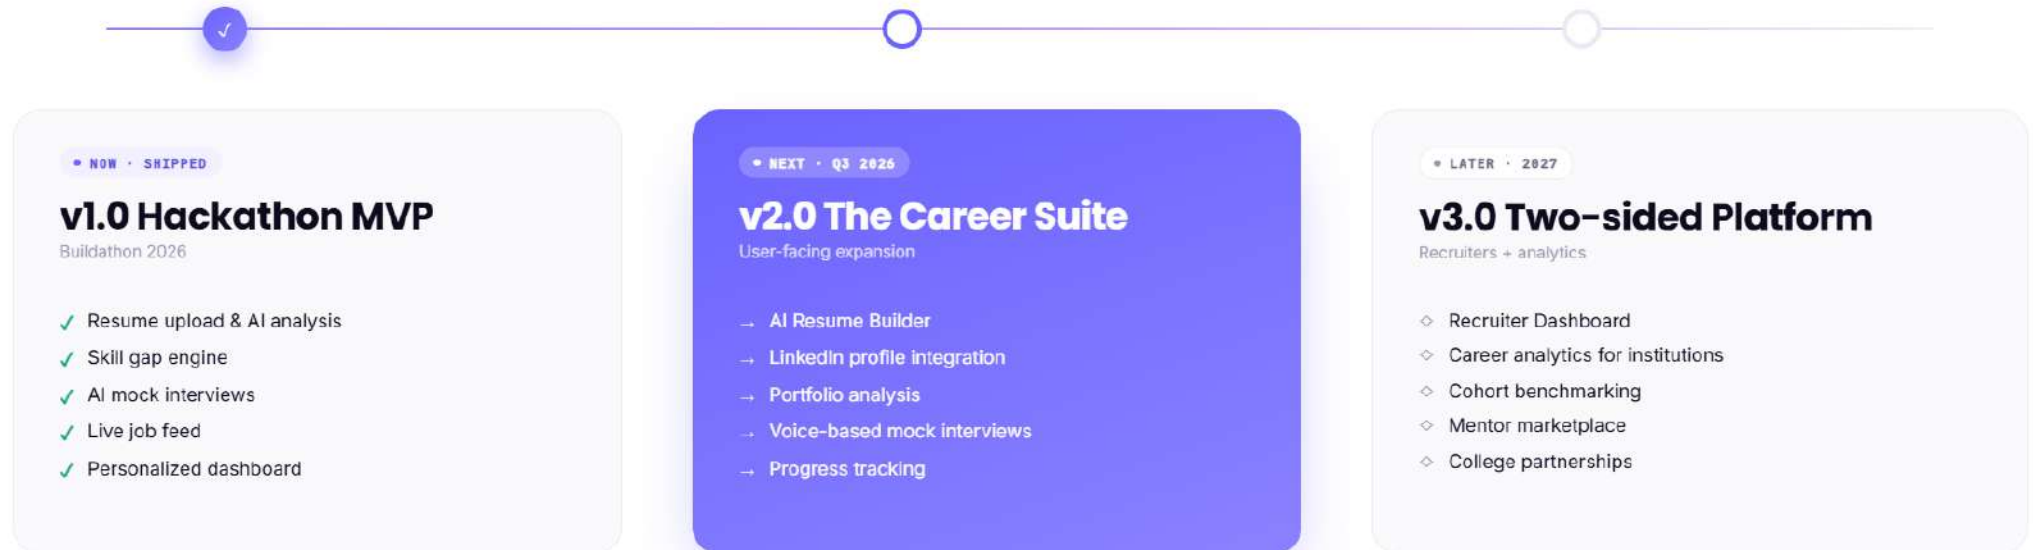

Freshers First

Purpose-built for students & early-career, not generic LinkedIn tooling.

A single upload replaces four platforms — and returns something none of them can: **context**.

From hackathon to **career OS**.

Where Path to Hire is heading — three phases across the next 12 months.
